bradbury®

Bradbury Group Ltd. is one of the most established physical security providers in the UK. We are made up of five divisions: Bradbury Security, Bradbury / Extendor Grilles & Cages, Cross-guard, Newton Security Doors and Martin Roberts Doors, with offices in Scunthorpe, London, Ayrshire and Kent.

Nationwide Delivery

We have a dedicated delivery fleet and our lead times are the best in our sector, with M2M+ doors delivered within 10-12 working days (15 working days for security rated products).

Installation Service

With over 20 years' experience in fitting security products, Bradbury's team of accredited installers are on hand to help, should you require their services.

Bespoke Design

Our expert technical teams have an excellent track record in devising bespoke solutions for complex projects and requirements.

Powder Coating Facilities

All Bradbury products are polyester powder coated to the highest standard, in our standard range of 52 colours. Custom powder coating, Extra Life™ paint guarantee and wood grain effects are also available.

Features & Applications	The M2M ⁴ range offers our highest level of security. Based on our successful M2M ³ product, the M2M ⁴ is further enhanced to offer a more secure doorset, whilst still maintaining a wide range of hardware options.	The M2M ³ range provides a comprehensive series of independently assessed and certified LPS1175 (Issue 7) Security Rating 3 doors. Driven by risk analysis and engineered in response to developing attack methodology, M2M ³ doors bring flexibility of specification to asset protection professionals.	The M2M ² is a highly secure and cost effective security door range, ideal for any location that requires certification and security against attacks, with a comprehensive range of locking options across single, leaf and a half, and double leaf doorsets.	Our M2M ¹ door is an outward opening single door design, featuring many aspects of our M2M ⁺ doors with the added advantage of third party testing. The doors feature a unique internal reinforcing system and are available with a selective range of locking options.	Our best-selling range of doors, the M2M ⁺ is a general purpose steel door with an unrivalled selection of extras, meaning each door can be tailored to suit your requirements. These attractive doors are suitable for a wide range of uses, from commercial to industrial, and even domestic.	We can incorporate certain non-standard hardware into our doors; please contact our sales team to determine whether the hardware will be compatible with our products.	A new range of security doors aimed specifically at the utilities market. Available as LPS1175 SR1, SR2 or SR3 doorsets, the doors include a range of ironmongery options specifically developed to suit substations, including ventilation options, lift off hinges, earthing points, padlockable shrouds and hasps and staples.

Features & Applications	Bradbury's latest development in window protection, Spartan ² and Spartan ³ are a range of high security bar sets. The modular design of the Spartan means they can be engineered to secure almost any opening, and present an effective visual deterrent against attack, vandalism and burglaries.	The strongest retractable grille on the market, and the only grille to have achieved LPS1175 SR3 and CPNI (base level). For use by British Government, Crossrail and other high security situations where the highest level of testing and certification is required.	The Vulcan retractable security grille is certified to LPS 1175 SR2 and is a 'Secured by Design' police preferred specification. As such, these grilles are insurance approved and have been successfully bomb blast tested in conjunction with glass backed anti-shatter security film.	A popular choice of grille, suitable for all but the highest security requirements, the Extendor Elite is approved by the Association of Chief Police Officers 'Secured by Design' initiative. The grille offers proven resistance to hacksaws and electric drills and includes multi-point locking and stainless steel shoot bolts as standard.	Extendor cages provide enhanced protection within a restricted or shared area; access can be controlled and monitored and clear lines of sight facilitate CCTV coverage and patrol guarding. Extendor cages also permit free airflow and are available in a wide range of sizes, from small safe boxes to entire rooms.	A best selling certified grille that is suitable for most security requirements. The attractive curved lattice shape is popular for both commercial and domestic properties.	The strongest self ventilating server safe on the market, offering security to all IT equipment with 3mm thick steel sides and 4mm thick steel frame. The Ventis provides sufficient ventilation for the equipment to operate, without the need for additional fans or air conditioning.

*In bomb blast mitigation tests, the Eclipse and Vulcan grilles were successfully tested in conjunction with glass backed with anti-shatter security film
