bradbury®

Bradbury Group Ltd. is one of the most established physical security providers in the UK. The Group is made up of five divisions: Bradbury Security, Extendor Grilles and Cages, Cross-guard, Newton Security Doors and Martin Roberts, with regional offices based in Scunthorpe, London, Ayrshire and Kent.

Nationwide Delivery

We have a dedicated delivery fleet and our lead times are the best in our sector, with M2M+ doors delivered within 10-12 working days (15 working days for LPS rated products).

Installation Service

With over 20 years' experience with the installation of security products, Bradbury's team of accredited installers are on hand to help, should you require their services.

Bespoke Design

Our expert technical teams have an excellent track record in devising bespoke solutions for complex projects and requirements.

Powder Coating Facilities

All Bradbury products are polyester powder coated to the highest quality in our standard range of 52 colours. Custom powder coating, Extra Life™ paint guarantee and wood grain effects are also available.

Features & Applications	Bradbury's M2M ⁴ range offers a selection of certified single and double doors suitable for all personnel, fire exit, access control and utility applications. The wide choice of hardware options allows the doors to be tailored to individual customer requirements.	The M2M ³ range provides a comprehensive series of independently assessed and certified LPS1175 (Issue 7) Security Rating 3 doors. Driven by risk analysis and engineered in response to developing attack methodology, M2M ³ doors bring flexibility of specification to asset protection professionals.	M2M ² is a highly popular with utilities clients, as it offers a high level of security whilst remaining an economical choice. Ideal for any location that requires security against attacks, M2M ² offers a comprehensive range of locking options across single, leaf and a half, and double leaf doorsets.	Bradbury's M2M ¹ is an outward opening single door design, featuring many aspects of our M2M ⁺ doors with the added advantage of third party testing. The doors feature a unique internal reinforcing system and are available with a selective range of locking options.	Bradbury's best-selling range of doors, M2M ⁺ is a general purpose steel door with an unrivalled selection of extras, meaning each door can be tailored to suit individual requirements. These robust doors are suitable for a wide range of uses, from commercial to industrial, and even domestic.	Our experienced engineering department may be able to incorporate certain non-standard hardware into our M2M ⁺ doors; please contact a Bradbury sales adviser to determine whether the selected hardware will be compatible with our products.	A new range of security doors aimed specifically at the utilities market, M2M ^{SUB} is available with LPS1175 certification, SR1-4. The doorsets include a range of ironmongery options developed to suit substations, including ventilation options, lift off hinges, earthing points, padlockable shrouds, and hasps and staples.

Features & Applications	The latest development in window protection, Spartan ² and Spartan ³ are Bradbury's range of high security bar sets. Spartan's modular design means they can be engineered to secure almost any opening, and present an effective visual deterrent against attack, vandalism and burglaries.	Eclipse is the only grille to have achieved LPS1175 SR3 and CPNI (base level), and is the strongest on the market. Utilised by clients such as HM Government, Crossrail, and Amazon, Extendor Eclipse is ideal for situations where the highest level of security and certification is required.	The Vulcan retractable security grille is certified to LPS 1175 SR2, and is a 'Secured by Design' Police Preferred Specification. As such, these grilles are insurance approved, and have been successfully bomb blast tested in conjunction with glass backed anti-shatter security film.	A popular choice of grille, suitable for all but the highest security requirements, the Extendor Elite is approved by the Association of Chief Police Officers 'Secured by Design' initiative. The grille offers proven resistance to hacksaws and electric drills and includes multi-point locking and stainless steel shoot bolts as standard.	Extendor Cages provide enhanced protection within a restricted or shared area; access can be controlled and monitored and clear lines of sight facilitate CCTV coverage and patrol guarding. Extendor Cages also permit free airflow and are available in a wide range of sizes, from small safe boxes to entire rooms.	Bradbury's best-selling certified grille, CX2 is suitable for most security requirements. The attractive curved lattice shape is popular for both commercial and domestic properties, and offers an attractive solution to securing windows and entranceways.	The strongest self ventilating server safe on the market, offering security to all IT equipment with 3mm thick steel sides and 4mm thick steel frame. Ventis provides sufficient ventilation for IT equipment to operate, without the need for additional fans or air conditioning.

*In bomb blast mitigation tests, the Eclipse and Vulcan grilles were successfully tested in conjunction with glass backed with anti-shatter security film.
