Features and Applications	The M2M ³ range offers an unrivalled selection of certified high security single and double doors suitable for all personnel, fire exit, access control and utility applications. The range has been Certified to LPS1175 (Issue 7), and the wide choice of hardware options allows the doors to be tailor made to individual customer requirements.	The M2M ² range is developed from Bradbury's successful M2M ³ range. Offering the most popular hardware options, it combines a lightweight design with the confidence of an LPS 1175 Security Rating.	Our M2M ¹ door is an outward opening single door design, featuring many aspects of our M2M ⁺ doors with the added advantage of third party testing. The doors feature localised reinforcing and are available with a selective range of locking options.	Our best-selling range of doors, the M2M ⁺ is a general purpose steel door with an extensive selection of extras to ensure that each door can be adapted to suit your individual needs. These attractive doors are suitable for a wide range of uses, from commercial to industrial and even domestic.	Bradbury's in-house technical team may be able to engineer tailored solutions if there is specific hardware to be included in the door; contact our sales team to find out more. Please note, a specialist charge starts from £62 per door, depending on the modification required.
