<b>Features &amp; Applications</b>	The M2M <sup>FL</sup> range provides flood defence doors, successfully tested to PAS 1188-1:2014. Particularly suitable for locations where security and flood measures are required, M2M <sup>FL</sup> doors are available with optional certification to LPS 1175 SR2 to SR4. Escape hatches can be integrated into M2M <sup>FL</sup> doorsets.	Offering Bradbury's highest level of attack resistance, M2M <sup>4</sup> is available as an outward or inward opening doorset, certified to SR4. Suitable for locations requiring high security, such as banks, high value retail establishments, and government buildings.	A comprehensive series of LPS 1175 SR3 certified doors, the M2M <sup>3</sup> is available with the UK's largest range of SR3 options. Driven by risk analysis and engineered in response to developing attack methodology, M2M <sup>3</sup> doors bring flexibility of specification to asset protection professionals.	Providing an economic choice without compromising on security, the M2M <sup>2</sup> has proven popular with utilities clients for remote access and substation sites. M2M <sup>2</sup> doors are available with a comprehensive range of certified locking options.	The M2M <sup>1</sup> is an outward opening single door design, certified to SR1. These doorsets are durable, and designed for internal and external use, to cope with high traffic levels. M2M <sup>1</sup> doors feature a unique internal reinforcing system, and are available with a selective range of locking options.	Bradbury's best-selling door, M2M <sup>+</sup> is a general purpose steel doorset with an unrivalled selection of options and extras, meaning each door can be tailored to suit individual requirements. These robust doors are suitable for a wide range of applications, from commercial to industrial, and even domestic.	For bespoke requirements, Bradbury's engineering department can incorporate most non-standard or customer-supplied hardware into Specialist doorsets. These doors are tailored to individual needs, with options such as stainless steel construction, coin access panels, and circular vision panels.	Martin Roberts offers a revolutionary range of innovative doorsets for inspiring buildings. Combining a high specification and seamless design, with fire and acoustic performance, the Capital <sup>45</sup> is designed for architects and specifiers of high profile buildings and projects.

<b>Features &amp; Applications</b>	Spartan <sup>2</sup> and Spartan <sup>3</sup> are high security bar sets, certified to SR2 and SR3, respectively. The modular design of the bar sets means they can be engineered to secure almost any opening. Spartan presents an effective visual deterrent against attack, vandalism and burglaries.	Vertex is a crowd loading emergency escape gate, suitable for high traffic, large scale applications, such as transport hubs, stadia, and shopping centres. These high security collapsible gates have exceeded load tests as specified in BS EN 1991-1-1:2002, and are certified to SR2 and SR3.	The only grille to have achieved SR3 certification, Eclipse is the strongest on the market. Ideal for the highest security requirements, the Eclipse is utilised by clients in government, transport and retail sectors. This grille was successfully bomb blast tested in conjunction with glass backed with anti-shatter security film.	With SR2 certification, the Vulcan retractable grille provides a high level of security for windows and entranceways. Vulcan and Eclipse are the only security grilles certified to protect against bolt cutters. This grille was successfully bomb blast tested in conjunction with glass backed with anti-shatter security film.	A popular choice of grille, suitable for all but the highest security requirements, the Elite retractable grille offers proven resistance to hacksaws and electric drills, and includes multi-point locking and stainless steel shoot bolts as standard.	Available with optional SR2 or SR3 accreditation, Cages provide enhanced protection within a restricted or shared area. Access can be controlled and monitored, and clear lines of sight facilitate CCTV coverage and patrol guarding. Cages are available in a wide range of sizes, from small safe boxes to entire rooms.	Bradbury's best-selling certified grille, CX2 is suitable for most security requirements. The attractive curved lattice grille offers an appealing solution to securing windows and entranceways. With SR1 accreditation, CX2 grilles are ideal for both commercial and domestic properties.	Certified to SC2, Ventis is the strongest self-ventilating server safe on the market, offering security to all IT equipment, with 3mm thick steel sides and a 4mm thick steel frame. Ventis server safes provide sufficient ventilation for IT equipment to operate, without the need for additional fans or air conditioning.

Peace of mind from the UK's largest manufacturer of steel security doors, grilles, cages and bar sets.
