

LIDDLE doors
SPECIALIST STEEL SECURITY PRODUCTS

WE ARE AN ESTABLISHED PROVIDER OF PHYSICAL SECURITY SOLUTIONS

With over 40 years of industry expertise, and trusted in the water and energy industries for over 25 years, Liddle Doors is a well-known supplier of physical security solutions, particularly to the utilities sector. As well as providing security and flood doors, Liddle Doors' portfolio includes high-security kiosks, bar sets, cylinder clamps and bottle frames.

Whether you require a single product or are managing a complex project, our team will work closely with yours to deliver high quality products and services that are tailored to meet your requirements. From site surveying to product installation, our team ensures that the completion of your project is to the highest standard.

EXPERT SOLUTIONS TAILORED TO YOUR SECTOR

Liddle Doors is a trusted provider of physical security products to a wide range of sectors, including water, telecoms, transport, and power distribution. Some of our most notable clients include Anglian Water, O2, Network Rail, and National Grid.

Servicing a range of sectors, we can offer a comprehensive physical security package that is made bespoke to your design specifications. With security accredited solutions, our extensive product range is additionally available with optional certifications, such as louvres for ventilation and fire and flood ratings.

PORTFOLIO

STEEL DOORS

The range of steel doors from Liddle Doors offers an assured level of protection for your buildings. They are all made-to-measure to suit your requirements, and are available at competitive prices.

Our LD2, LD3 and LD4 doorsets are LPCB certified to LPS 1175 SR2, SR3 and SR4, respectively. LD2 doors provide defence against opportunist attacks, whereas LD4 doors are designed to protect against experienced attempts of forced entry.

LD2 doors are fitted with MICO Elite locks, and LD3 and LD4 doors are fitted with MICO Abryll locks. All of these doors are available with a range of ancillary items, vision panels and louvres, to suit your requirements.

For applications where a certified level of security is not required, we also offer LD+ doors, which are available with an unrivalled selection of hardware, ironmongery, panels and ancillary items.

All of these doors are also available with additional certification to combat other potential risks, such as a fire rating of up to FD240, or PAS 1188 for flood protection. Acoustic and thermal ratings are also available, and are determined by the specification of the doorsets.

BAR SETS

Spartan is a range of high-security bar sets, comprising of the Spartan2, Spartan3 and Spartan4, certified by the LPCB to LPS 1175: Issue 7 SR2, SR3 and SR4, respectively.

The lightweight construction of Spartan ensures ease of installation for large-scale projects, and the stackable modular design means they can be engineered to secure almost any opening.

Reveal or face fixed options are available, and Spartan security bars are suitable for internal or external installation.

Spartan security bars are assessed for certified installation directly into brickwork, concrete or steel, and are available with or without a range of security fasteners, to suit substrate of installation.

Spartan bar sets are supplied galvanised, or polyester powder coated in a range of colours and finishes, as standard. For ultimate product longevity, Spartan bar sets can be both galvanised and polyester powder coated.

KIOSKS

Designed to protect vulnerable buildings and high value assets, we offer a range of modular enclosures which are certified by the LPCB to LPS 1175 Security Rating 3 and 4. Kiosks can be manufactured to any size, and can be used for direct replacements or over units.

Standard units are supplied with padlockable single or double leaf doors. Padlocks are protected with a user-friendly shroud. Optional upgrades include key access doors, Celotex insulation, and varnished ply lining.

We also offer a certified demountable roof system to aid servicing requirement of protected assets. Smaller sample tap units can be complemented with stainless steel backboards and galvanized drip trays.

Units can also be designed to include fan housings, alarm contact brackets and external vent cowlings to provide a well-ventilated, secure and certified solution. Additionally, we have a range of top hat solutions available for ground or wall top asset protection.

PRODUCTS

CYLINDER CLAMPS & BOTTLE FRAMES

Developed in conjunction with the Security and Emergency Measures Direction, Liddle Doors' cylinder clamps are used to secure gas bottles in sensitive areas.

They are designed to protect against theft and misuse of hazardous chemicals. Offering a certified level of protection, our cylinder clamps are accredited to LPS 1175 SR2 by the LPCB.

ACCESS COVERS

The high security access covers and frames from Liddle Doors are available with LPCB accreditation to LPS 1175 SR2, SR3 or SR4, with a protected locking device.

Designed primarily for the water and utilities sectors, these access covers provide asset security and protection by preventing unauthorised access, usually via manholes in the ground.

SERVICES & SOLUTIONS

Liddle Doors offers a comprehensive package of services and bespoke security solutions to suit varying customer requirements and project briefs.

With Perfect Delivery recognition, our qualified and skilled engineers install to the highest standard nationwide.

We also offer project management from survey and design to installation and maintenance, including liaising with clients, main contractors or sub contractors.

All of our products are bespoke-engineered in-house, allowing us to offer a wide range of physical security solutions, which are tailored to individual requirements.

With a dedicated engineering team and state-of-the-art production facilities, this enables us to also develop, design and manufacture bespoke solutions.

To offer a complete security solution package, we have also supplied isolator and security boxes, anti-climb fencing, security cabinets and roller shutters.

SERVICES

WE ARE PROUD TO BE PART OF BRADBURY GROUP

Liddle Doors has joined Bradbury Group, the nation's leading manufacturer and provider of steel doors and physical security solutions, bringing together a wealth of specialist knowledge and experience to offer a complete package.

Being part of the Group enables us to offer an extensive series of physical security products and associated services, at competitive prices and in industry-leading lead times.

The Group's impressive product portfolio includes communal entrance doors, architectural steel doors, grilles, cages, and crowd control gates.
